1 Introduction

This document is aimed at helping developers to effectively use the redesigned UNDP (United Nations Development Program) responsive widgets easily for development. This document covers the details new sets of responsive widgets for developing the UNDP website templates and also lists down the UI widgets to be replaced from the existing webpages to make the UI responsive. Starting with components on the UNDP Home page, this document is meant to guide the developers with clear mapping of existing and new widget layouts and HTML.

2 Migration guide

All the responsive templates have been developed using Bootstrap 3 as a base framework. The Kitchen Sink provided with this UI guide provides details of the UNDP themed components including the Typography to be used for theme. This document describes different sections of the templates, widgets used in these different section and the styling details used for different sections of the templates. Kitchen sink provided with the package also gives the details of the widget templates that are to be replaced with the older non-responsive widgets. The new UNDP UI widgets are developed using/overriding the basic [Bootstrap 3 components](#).

All the planned templates can be developed using 2 basic templates viz., Home template and 3 column Bootstrap template layout. The following section list the code for existing template and new template so that the older template can be easily replace by new one. Developers can also refer to the Kitchen sink for getting the new widgets template details.

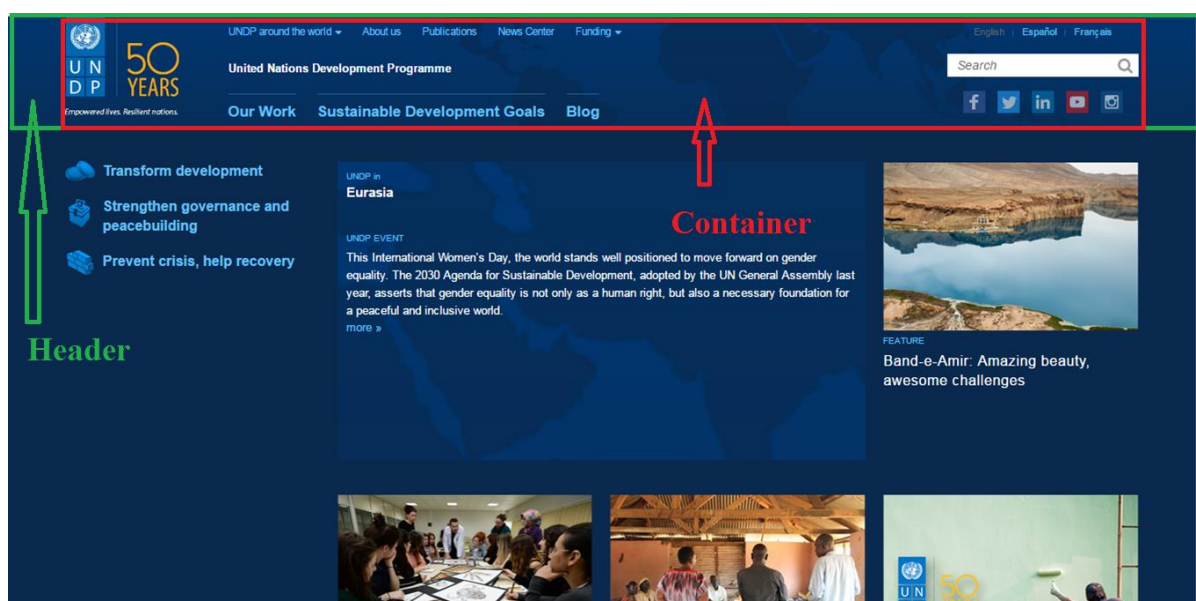

2.1 Master Home Template Layout:

The basic Wire-frame for Home Template Layout is as below which should be used to design the basic structure for Home Layout. Developer can add/edit the components inside this Home Template as per the design need/requirement. The older template has to be replaced with eth template shown below. Migration steps/code to be replaced for all the elements in the current design widgets to the new responsive widgets have been stated after the template details.

HTML Before in the section to follow represents the current/older code to replace by *HTML After*, the new code.

2.1.1 Base responsive Master Home Template Layout

```
<header class="undp-header">
  <div class="container">
    <a href="/" class="box-logo pull-left"></a>
    <div class="box-right clearfix"></div>
  </div>
</header>
<div class="main-content home-main-content">
  <div class="container">
    <!--Row with three columns divided in 1:3 ratio-->
    <div class="row">
      <div class="col-md-3"><!--Column left--></div>
      <div class="col-md-9"><!--Column right--></div>
    </div>
  </div>
</div>
<footer class="undp-footer">
  <div class="container">
  </div>
</footer>
```

2.1.2 Home Template Header Section

Wire-frame for Home Template Header Section is as below:

```
<header class="undp-header">
  <div class="container">
    <a href="/" class="box-logo pull-left"></a>
    <div class="box-right clearfix"></div>
  </div>
</header>
<div class="main-content home-main-content">

</header>

```

HTML Before:

```

<div id="container" class="country-home">
  <div id="header">
    <div class="content">...
  </div>
</div>

```

HTML After:

```

<header class="undp-header">

Header section is common for the templates redesigned. The **CSS class** used is 'undp-header'. Following CSS is used for the Header section:

CSS for responsive widget:

```

.undp-header {
  min-height: 124px;
}

```

```
border-bottom: 1px solid rgba(38, 95, 145, 0.5);
background: transparent url("../images/bg-header.png") no-repeat top center;
background-size: cover;
}
@media (max-width: 767px) {
.undp-header {
min-height: 88px;
background: #043264;
}}
```

2.1.2.1 Home Template Header Container section

Standard bootstrap Container is used inside the header section. Header template container contains different components sections. All these widgets along with its CSS are described below:

2.1.2.1.1 Logo Box

This is a main tab navigation menu, a standard Bootstrap navigation widget which gets converted into hamburger menu in mobile or tablet view. The '*Navs*' section in the Kitchen sink has details of this widget.

2.1.3 Home Template Container section

Wire-frame for Home Template Header Container is:

```
<div class="main-content home-main-content">
  <div class="container">
    <!--Row with three columns divided in 1:3 ratio-->
    <div class="row">
      <div class="col-md-3"><!--Column left--></div>
      <div class="col-md-9"><!--Column right--></div>
    </div>
  </div>
</div>
```

The content of the page is shown in the container. The **CSS classes** used for this are

- .main-content .home-main-content
- .container

```
.main-content {
  padding: 38px 0 0;
}
```

The container section shown in the image contains basically 2 sections viz., Left Panel and article grid.

2.1.3.1 Master Home Template Left Panel:

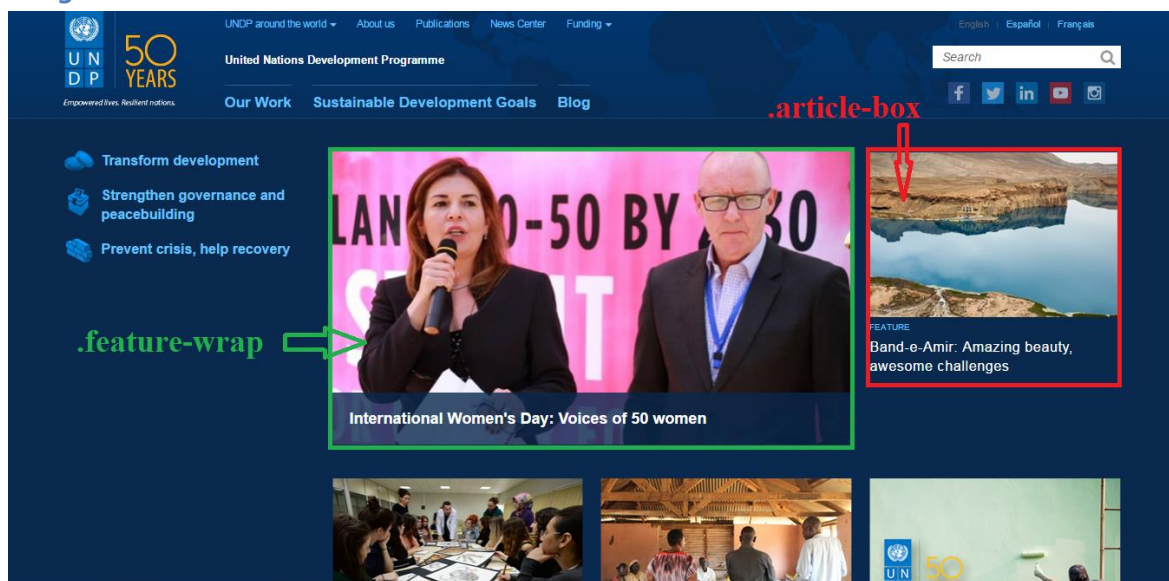

CSS for responsive widget:

```
.list-unstyled {
  padding-left: 0;

2.1.4 Home Template Footer section

Wire-frame for Home Template Footer is as below:

```

< footer class="undp-footer">
  <div class="container">
    </div>
  </footer>

```

Footer is globally used in all the templates. The **CSS class** used is 'undp-footer'. The Home Template Footer section has two sub-sections viz., Footer navigation links and copyright section which are shown as below.

Following are the **CSS** used for the same:

HTML Before:

```

<div class="globalFooterInfoBoxes">
  <div id="footer">
    </div>
  </div>

```

HTML After:

```

<footer class="undp-footer">

2.2 Master 3 Column Template

[Master 3 Column Template](#) is used to make the UI responsive and manageable. The basic template structures for the same is shown as below, and in the next sections the components and widgets which can be added into the 3 Column templates, are introduced. All the templates apart from Home can be developed using this basic layout. Depending on the need different widgets can be added in the basic layout shown below,

```
<header class="undp-header">
  <div class="container"><a href="/" class="box-logo pull-left"></a>
</div>
</header>
<div class="main-content main-content-work">
  <div class="main-subnav">
    <div class="container">
    </div>
  </div>
  <div class="container">
    <ul class="list-inline undp-breadcrumb">
    </ul>
    <div class="row">
      <!--Row with three columns divided in 1:2:1 ratio-->
      <div class="col-md-3"><!--Column left--></div>
      <div class="col-md-6"><!--Column middle--></div>
      <div class="col-md-3"><!--Column right--></div>
    </div>
  </div>
  <div class="info-link-box">
    <div class="container">
    </div>
  </div>
</div>
<footer class="undp-footer">
  <div class="container">
  </div>
</footer>
```

2.2.1 Master 3 column Template - Main sub-navigation Menu (Scrollable links)

Scrollable Links/Main navigation menu provides the main navigation panel for the page. This widget can be seen as 'our-work' page template. The widget is documented in the Kitchen sink.

This widget is created using **jQuery plugin** to scroll the links. The detailed documentation for the same can be found at <http://kenwheeler.github.io/slick/>.

HTML Before:

```
<div class="subnav">
  <div id="nav-sub">
    <ul class="clearfix">
      <li class="" style="width: 191px;">
        <a class="first"
href="/content/india/en/home/ourwork/povertyreduction" style="font-size: 16px;">Poverty Reduction</a>
      </li>
      <li class="" style="width: 191px;">
        <a class=""
href="/content/india/en/home/ourwork/democraticgovernance" style="font-size: 16px;">Democratic
Governance</a>
      </li>
      <li class="" style="width: 191px;">
        <a class=""
href="/content/india/en/home/ourwork/environmentandenergy" style="font-size: 16px;">Environment and
Energy</a>
      </li>
      <li class="" style="width: 191px;">
        <a class=""
href="/content/india/en/home/ourwork/humandevlopment" style="font-size: 16px;">Human
Development</a>
      </li>
      <li class="" style="width: 191px;">
```

```

<a class="" href="/content/india/en/home/ourwork/health" style="font-size: 16px;">Health</a>
</li>
</ul>
</div>
<!-- end of #subnavigation -->
</div>

```

While making the CSS responsive, the main sub-navigation menu list is being replaced by the following:

HTML After:

```

<ul class="list-main-nav">
  <li><a href="our-work.html">Our Work</a></li>
  <li><a href="sustainable-development-goals.html">Sustainable Development Goals</a></li>
  <li><a href="javascript:void(0);">Blog</a></li>
</ul>

```

The respective **CSS classes** are shown below:

```

.main-subnav {
  overflow: hidden;
  height: 57px;
}

2.5 Java Scripts Up gradation

The older Javascript files/plugins used has to be replaced with new set of files. These files are provided with the developer guide package. Following files and plugins are provided as a part of the package.

| Sr. No | Template Name | JS file(s) used |
|--------|--|------------------|
| 1 | Master Home Template Mobile Slide Menu Button | off-canvas.js |
| 2 | Header Menu links- UNDP around the world | countries-pop.js |
| 3 | Header Menu links- Funding | header.js |
| 4 | Header Menu links- UNDP around the world- Go to Top Button | go-to-top.js |
| 5 | Hover effect | card-flip.js |
| 6 | jQuery Plugin used for Scrollable Links | slick.min.js |
| 7 | Add this file along with the slick.min.js (for Scrollable Links from Left to Right scrolling) | ltr-slick.js |
| 8 | Add this file along with the slick.min.js (for Scrollable Links from Right to Left scrolling) | rtl-slick.js |
| 9 | It is the external JS library (jQuery and bootstrap combined) and necessary before any JS on every template. | vendor.min.js |
| 10 | It contains the bootstrap functions and the demo is shown in the kitchen sink. | popover.js |
| 11 | It contains the bootstrap functions and the demo is shown in the kitchen sink. | tooltip.js |

For any new functionality (out of those provided with Mock-ups) developer can add new Javascript files or plugins along with these files.

2.6 Styling migration

The document above describes the styling (CSS) for all the components those has to be migrated. The development UI package is also provided with a separate UNDP UI theme guide which can be used as a reference for the migration.
